

INDIANA STATE UNIVERSITY BRAIN STUDY

Lifespan Cognition & Brain Stimulation Lab

Interested in brain research?

Participate in a new study investigating aging!

LIFESPAN COGNITION **& BRAIN STIMULATION LABORATORY**

The Lifespan Cognition & Brain Stimulation (L-CABS) Lab is currently conducting research studies that examine differences in cognition across the lifespan entitled “Age Differences in the Effects of Cerebellar tDCS on Brain Networks, Activation, and Behavioral Performance”.

Eligibility Requirements: 18-30 or 55 years+, right-handed, no history of neurological disorder or head injury, no past brain injuries, no damaged skin on the head/scalp or skin diseases, not pregnant, no history of seizures.

All research will be conducted on the Indiana State Campus. The study will take about 2 hours. Parking will be provided when necessary, and all participants will receive a \$20 gift card for their time.

If you are interested in participating or would like to know more, please contact the lab via phone or email.
