Student Volunteers Needed!

Social Connection Initiative

Quarantine and Isolation can be boring, challenging, and lonely. Student Health Promotion is piloting a new program to connect students in quarantine and isolation with other students. *The goal of this program is provide students with social and emotional support during their quarantine or isolation period.*

This program will help students connect with a Quarantine Buddy (QBuddy) or Isolation Buddy (iBuddy) and host game nights & support groups.

Interested in participating and helping students?
